MUS 470 Homework 1

Survey of Project Ideas

Fall 2024

Respond briefly to each of these questions, in 2-4 sentences. This is an exercise in writing down your current thoughts and does not have to be researched in depth. It is important to answer the questions, as place-holders, even if you do not have specific preferences or interests.

1. What is your current favorite area of audio development that interests you?

2. What is an algorithm, or group of computations, that you would like to implement?

3. How do you imagine that your audio project work in this course could play a role in your future employment?

4. If you have to shift away from your favorite area of audio development, which other area seems like a good choice that you would be happy to explore?

5. Give an example of a type of question that you could imagine being asked by an employer when viewing your audio project demo.
